

SGS[®]

Solid Carbide Tools

An ISO 9001 Certified Company

Solid Carbide Tools

An ISO 9001 Certified Company

Focus on: High-Performance Solutions

There are many companies that manufacture round solid carbide cutting tools. But when staying competitive requires finding ways to reduce overall cost by improving process, customers need more than just cutting tools. They need a partner who can offer unique, customer-centered solutions, technical support and application expertise.

We are toolmakers, machinists, technicians and office associates...and for 50 years, we've been making solid carbide rotary cutting tools. That steadfast commitment has given us an intimate familiarity with your challenges and made us uniquely qualified to help you overcome them.

We don't have a Solid Carbide Rotary Cutting Tool Division. We *are* Solid Carbide Rotary Cutting Tools...and our focus is on putting them to work for you.

Ti-NAMITE[®]

TOOL COATINGS

Developed and applied in our own PVD coating facility, Ti-NAMITE tool coatings are specifically engineered for SGS solid carbide rotary cutting tools. This proprietary multi-layering process results in maximized tool life and increased speed and feed rates in any application.

SOLID CARBIDE END MILLS

Focus on: High-Performance Innovation

Staying in close touch with customers is one of the most important steps of our R&D process. After all, no one is more familiar with the complexities of machining than our customers. SGS is committed to fulfilling those ever-changing needs, which is why we continue to develop our best-selling High Performance line of tools, including patented end mills, drills and engineered coatings.

Whether you're roughing or finishing, working with the most common or exotic of materials, SGS offers a high performance solution that can dramatically reduce your overall process cost.

Patented cutting tools and high-performance solutions are just part of what you get when you choose SGS. Our Associates take pride in a job well done. They create revolutionary tool designs and meticulously test for quality. They ensure that you get what you order...on time, every time. Sales Engineers are available worldwide to answer technical questions and provide solutions to your specific needs...and your complete satisfaction is their goal.

Focus on: High-Performance People

Your success is their success. One of our most important corporate commitments is in ensuring that our Associates have the tools to achieve that success. In addition to providing continuing education and employee enrichment programs, SGS is also a proud member of the Scanlon Leadership Network and adheres to Kaizen management best practices.

The goal of SGS Tool Company Associates is customer satisfaction, through commitment to continuous improvement of quality products and services.

SGS is committed to the professional and personal enrichment of its Associates. From seminars and continuing education to our Journeyman Toolmaker Apprenticeship program, SGS provides unique opportunities for Associates to develop their skills and talents.
